

IJUG

A MAGIC ITEM FOR FIFTH EDITION

Adventuring is easier with iJug.

GROSS. THAT'S IJUG!

Legend says a mage once had the brilliant idea of squeezing a Beholder into an Alchemy Jug! This, and the subsequent smear on the wall, is the result.

I JUG

Wondrous item, rare

This purple jug is covered in multi-colored glass eyes. It's made entirely of ceramic and without any kind of visible opening. It appears to hold a gallon of liquid. When shaken, the sounds of sloshing can be heard inside.

You can use an action to poke one of the eyes on the jug, which will produce a liquid of the type determined by the table below. That liquid will then pour out, up to 2 gallons per minute. The maximum amount of liquid it can produce varies by each liquid. The liquid can be caught and placed in a vial or similar container.

Once the jug starts producing a liquid, it cannot produce a different one, or more of the same after reaching its maximum, until the next day.

I CHAR
